

Milk, animals and regional structure: Kinki

A source-bound regional reading across Japan's eight conventional report regions.

RAW MILK

207,961 t

Position 7 / 8 · 2024

DAIRY CATTLE

28,760 head

Position 7 / 8 · 2025-02-01

SOURCE-DEFINED HOLDINGS

336 holdings

Position 7 / 8 · 2025-02-01

DAIRY CATTLE PER HOLDING

85.6 head / holding

Position 3 / 8 · 2025-02-01

Core comparisons: raw milk, dairy cattle, source-defined holdings and dairy cattle per holding. **Additional modules:** national share, processing orientation and prefecture distribution. Processing data available: 0 / 4 fields. No composite score is calculated.

Component prefectures: Hyogo, Mie, Kyoto, Nara, Shiga, Osaka, Wakayama

Raw milk and national share

207,961 t

Position 7 / 8

Kinki's national share is **2.8%**. This is a view of the same 2024 milk tonnes and is not counted as another engine or another leaderboard.

National share uses the exact sum of the canonical 47-prefecture source layer: 7,357,451 t.

Bar lengths use a linear scale from zero to the largest regional raw-milk value. Printed tonne values are exact.

Period: 2024. Position is descriptive and carries no better/worse interpretation.

Dairy cattle and source-defined holdings

DAIRY CATTLE 28,760 head Position 7 / 8 · 2025-02-01	SOURCE-DEFINED HOLDINGS 336 holdings Position 7 / 8 · 2025-02-01	DAIRY CATTLE PER HOLDING 85.6 head / holding Position 3 / 8 · 2025-02-01
---	---	---

Wording limit: holdings are the source-defined statistical units. They are not automatically producers, farms, companies or processors. Period: 1 February 2025.

Reported processing-use volume

UNAVAILABLE

No processing value is imputed for Kinki.

Unavailable under the accepted Table 6 suppression policy; no value is imputed.

AFFECTED FIELDS	DATA TREATMENT	UNAFFECTED MODULES
- Total raw milk processed - Milk-directed share - Dairy-product-directed share - Cheese-directed share	No value imputed.	Raw milk, livestock, holdings and prefecture distribution remain available.

Processing shares are views within one processing-orientation module. Milk-directed and dairy-product-directed shares may not sum to 100% because other or loss categories are not displayed. Cheese-directed raw milk is a subset of dairy-product-directed processing and is an input-use measure, not cheese output.

Different geography frames: Raw-milk production is attributed to where milk is produced. Processing-use volume is aggregated from surveyed processing plants and dairy-product factories in each prefecture. The two regional totals are not expected to reconcile, and the difference is not a net milk-flow measure.

How raw milk is distributed inside the region

#	Prefecture	Raw milk	Region share
1	Hyogo JP-28	73,407 t	35.3%
2	Mie JP-24	57,821 t	27.8%
3	Kyoto JP-26	26,283 t	12.6%
4	Nara JP-29	21,351 t	10.3%
5	Shiga JP-25	16,939 t	8.1%
6	Osaka JP-27	7,987 t	3.8%
7	Wakayama JP-30	4,173 t	2.0%

LARGEST PREFECTURE SHARE

35.3%

Not independently ranked · 2024

TOP-THREE PREFECTURE SHARE

75.7%

Not independently ranked · 2024

PREFECTURE-DISTRIBUTION HHI

0.237

Not independently ranked · 2024

EFFECTIVE PREFECTURE COUNT

4.22

Not independently ranked · 2024

These are four views of one prefecture- distribution module, not four independent engines. HHI here is geographic distribution, not processor or market concentration.

Four separate JP8 positions

MILK.RAW_TONNES
Position 7 / 8
207,961 t

- Chugoku is the next higher value, 101,203 t above.
- Shikoku is the next lower value, 101,134 t below.

LIVESTOCK.DAIRY_CATTLE_HEAD
Position 7 / 8
28,760 head

- Chugoku is the next higher value, 15,520 head above.
- Shikoku is the next lower value, 13,420 head below.

LIVESTOCK.HOLDINGS
Position 7 / 8
336 holdings

- Chugoku is the next higher value, 147 holdings above.
- Shikoku is the next lower value, 109 holdings below.

STRUCTURE.CATTLE_PER_HOLDING
Position 3 / 8
85.6 head / holding

- Chugoku is the next higher value, 6.1 head / holding above.
- Kyushu and Okinawa is the next lower value, 3.1 head / holding below.

REGIONAL READING

Kinki is in position 7 of 8 for 2024 raw milk and in position 3 of 8 for dairy cattle per source-defined holding on 1 February 2025; the positions describe separate dimensions and carry no performance interpretation. Hyogo accounts for 35.3% of the region's reported raw milk across its seven component prefectures.

No view is duplicated, no overall score is produced, and the report does not name a winner. Exact values determine standard-competition positions.

METHOD LIMITS

• JP8 is a conventional Hedegreen Research frame.

• Milk and livestock periods differ.

• Unavailable does not mean zero.

• No proximity distance is shown.

• The map does not locate farms or processors.

REPRODUCIBILITY

Official prefecture values are summed into JP8. Derived shares and ratios are recomputed from regional totals. Source periods: 2024, 2025-02-01.

Official links are embedded in the PDF. Local immutable receipts and source hashes remain bound to the report.

Distinct source hashes count unique input artifact hashes referenced by displayed metrics; they do not count rows or modules.
