

TRACTUS : Verification Takes 60 Seconds

A short note on how reaction outpaces verification, even when verification is easy.

2026.03.22 13:13 DENNIS HEDEGREEN OPEN OPEN-NOTE

I saw a post being shared.

Strong reactions.

Strong language.

Strong certainty.

No one checked.

I opened the source.

Truth Social.

The original post.

It took less than a minute.

This is not the full truth.

It is one step deeper than reaction.

This is not about politics.

This is about process.

Follow the trace.

Reaction comes first.

Verification comes later.

Or not at all.

The system rewards speed.

Not accuracy.

The faster you react, the more visible you become.

The slower you verify, the more invisible you are.

So most people react.

Even when verification is easy.

Even when it takes less than a minute.

The failure is not the person.

The failure is the structure.

TRACTUS:

Follow the path.

Do not stop at the first conclusion.

See where it breaks.

— Dennis Hedegreen, still checking
